

Congratulations ON YOUR ACHIEVEMENT!

Recovering from an illness or accident is a team effort with you being the hub of all those assisting you to maximum recovery.

Once You Are Discharged, You Are Not Forgotten!

There is still an opportunity for you with our *RECONNECT* program.

Once you go home, you may find there are additional skills, teaching, training and rehabilitation you would like; or you may experience a slight decline from the times when you were surrounded with an entire health care team.

The Good News is...

RECONNECT WAS DESIGNED WITH YOU IN MIND.

Medicare allows you to be readmitted within 30 days of discharge as long as it is for the same condition you were previously treated.

You may use some or all of your unused days in the ReConnect Program and we encourage you to utilize all resources for maximum recovery.

Our healthcare team is already well acquainted with your special needs and is in a position to help you avoid another hospitalization and eliminate the frustrations of someone new learning your healthcare needs. The team is eager to aide you and assure you attain your maximum potential.

RECONNECT Today to take advantage of this hidden opportunity.
