

# CONSIDERING CARDIAC SURGERY?

Versailles Health Care Center is proud to offer our **CARDIAC RECOVERY PROGRAM**. Our main goal is to provide specialized care to cardiac patients allowing them to return home sooner. **We send an average of 100 patients home every year!**

You may be considering cardiac surgery if you suffer from high blood pressure, swelling, shortness of breathe, and generalized fatigue. If you plan to have surgery in the future, you should seriously consider having either inpatient or outpatient therapy at The Rehab Clinic at Versailles Health Care Center.

We are pleased to offer a comprehensive rehabilitation program to help our patients with heart disease. We offer preventative, therapeutic and post surgical care.

Our team of professionals include physical therapists, occupational therapists, dieticians, nurses, a pulmonary rehab specialist, a licensed social worker and a licensed activity director.
